Name _____

Date _____

Across

1. Area where land meets the sea or ocean.
4. A shallow body of water.
7. Silt deposited at the mouth of a river.
8. A rocky pool separated from the sea at low tide, filled with seawater.
9. A small sheltered bay or coastal inlet.
12. A body of water confined to a relatively narrow but long region.
13. Coastal upland regularly flooded by the tides.
15. A recessed, coastal body of water connected to an ocean or lake.
16. A piece of land bordered by water on three sides but connected to mainland.
19. A coastal dune landform that forms by wave and tidal action.
20. A large headland extending into a body of water, usually the sea.
21. A partially enclosed body of water with a river flow; freshwater meets saltwater.
22. Hole at the top of a sea-cave where waves force water of the hole.
23. A long, narrow ocean inlet with steep sides or cliffs, created by glaciers.
24. A vertical, or near vertical, rock face of substantial height.

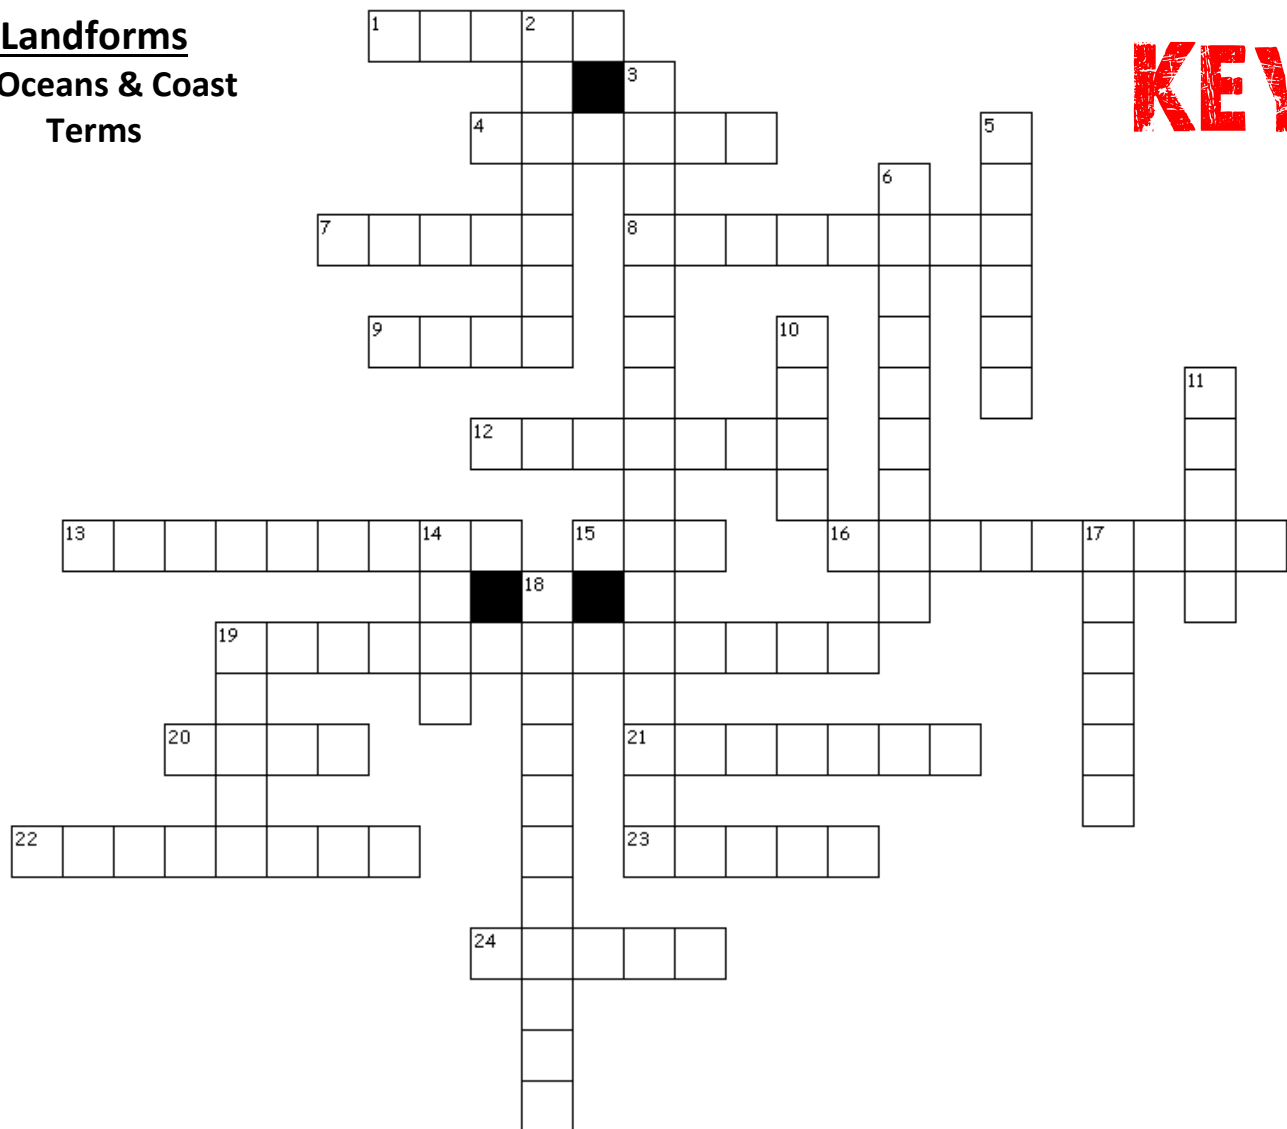

Down

2. A cave formed by wave erosion.
3. A portion of a continent submerged under shallow water.
5. Any piece of land surrounded by water.
6. Outcrop of rock in the sea formed by the growth of stony coral skeletons.
10. A large inlet from the ocean.
11. Ring-shaped coral reef, with a central lagoon and perhaps islands around the rim.
14. A coastal sand bar or beach formed by moving sand and waves.
17. A narrow waterway that connects two larger bodies of water.
18. A group of islands.
19. Area of loose particles at the edge of a body of water.

KEY

Across

1. Area where land meets the sea or ocean. **coast**
4. A shallow body of water. **lagoon**
7. Silt deposited at the mouth of a river. **delta**
8. A rocky pool separated from the sea at low tide, filled with seawater. **tide pool**
9. A small sheltered bay or coastal inlet. **cove**
12. A body of water confined to a relatively narrow but long region. **channel**
13. Coastal upland regularly flooded by the tides. **salt marsh**
15. A recessed, coastal body of water connected to an ocean or lake. **bay**
16. A piece of land bordered by water on three sides but connected to mainland. **peninsula**
19. A coastal dune landform that forms by wave and tidal action. **barrier island**
20. A large headland extending into a body of water, usually the sea. **cape**
21. A partially enclosed body of water with a river flow; freshwater meets saltwater. **estuary**
22. Hole at the top of a sea-cave where waves force water of the hole. **blowhole**
23. A long, narrow ocean inlet with steep sides or cliffs, created by glaciers. **fjord**
24. A vertical, or near vertical, rock face of substantial height. **cliff**

Down

2. A cave formed by wave erosion. **sea cave**
3. A portion of a continent submerged under shallow water. **continental shelf**
5. Any piece of land surrounded by water. **island**
6. Outcrop of rock in the sea formed by the growth of stony coral skeletons. **coral reef**
10. A large inlet from the ocean. **gulf**
11. Ring-shaped coral reef, with a central lagoon and perhaps islands around the rim. **atoll**
14. A coastal sand bar or beach formed by moving sand and waves. **spit**
17. A narrow waterway that connects two larger bodies of water. **strait**
18. A group of islands. **archipelago**
19. Area of loose particles at the edge of a body of water. **beach**
